ABOUT ME	I'm a Software Developer with a degree in Software Development and Mobile Platforms from Jönköping University. Over the past year I have taken a project from an idea to a working AI prototype at Jönköping Energi, built mobile applications together with a professional development team, and worked as a licensed security officer alongside my studies. I write clean, maintainable code on both the frontend and the backend, I pick up new technologies quickly, and I enjoy the moment when a difficult problem finally falls into place. I work just as well on my own as I do in a team, and I am looking for a role where I can keep building software that people actually use.
----------	---

EXPERIENCE

Jan 2026 — Present	Tempest AB (Security Company) Security Officer, part-time Current job.	Jönköping
Jun 2025 — Dec 2025	Avarn (Security Company) Security Officer	Jönköping
Jun 2025 — Jul 2025	Jönköping Energi Programmer / App Developer - Summer job of five weeks. - Worked on the development of mobile applications and internal systems. - Took part in programming, testing and improving user interfaces. - Collaborated with the development team to implement new features and improve performance.	Jönköping
Jun 2024 — Aug 2024	Restaurant (Strandbadens Restaurang & Pub) Chef	Öland
Jun 2023 — Aug 2023	Restaurant (Kroken Sallad och Fisk) Chef	Öland
2022 — 2023	Home Assistance Care Assistant	Pålsboda
2019 — 2021	Coffe Chef Öland, Summer Seasons 2019-2021	Byxellkrok
2017 — 2018	Preschool (Förskolan Gullvivan) Teacher Assistant Summer Seasons 2017-2018	Pålsboda

INTERNSHIP

Feb 2025 — May 2025

Internship, Software Development

Jönköping Energi

Supervisor: Robin Kochauf, Jönköping Energi

- Worked on the development of the Jönköping Energi app.
- Contributed to both backend and frontend development.
- Took part in the team meetings and in the release of the new version of the app.

DEGREE PROJECT

Feb 2026 — Jun 2026

Object Detection in Industrial Environments Using AI

Jönköping Energi

Bachelor's Thesis (Exjobb), Jönköping University

Built and evaluated an AI prototype that automatically identifies iron pipes, insulation and pallets in photographs from a real industrial environment. I collected and annotated a dataset of roughly 800 images in Label Studio, trained and compared several YOLOv8 models across different image sizes and epoch counts, and built a dashboard where an image can be uploaded and run through the model. The best configuration (YOLOv8s, 840 px, 150 epochs) reached 67.5% precision, 54.6% recall and 55.5% mAP@0.5 with an inference time of 5.5 ms. This was my thesis (exjobb) and I ran the whole project on my own, from data collection and annotation to training, evaluation and presentation, with supervision from Jönköping University and from Piroz Kristedt at Jönköping Energi.

Presentation of the project: [LinkedIn](#)

EDUCATION

Sep 2023 — Jun 2026

Jönköpings University

Jönköping

Software Development and Mobile Platforms

|Android, iOS, Kotlin, CSS, HTML, C++, C, Python, Java|

2019 — 2021

Natural Sciences, Alléskolan

Hallsberg

Folkasboskolan, Secondary School (years 7-9)

Pålsboda

SKILLS

- Frontend & backend development
- Programming languages: Java, Kotlin, Python, C, C++, JavaScript, SQL
- Mobile development: Android and iOS, interface design
- Web development: HTML, CSS, JavaScript, REST APIs
- Databases, data structures and algorithms
- AI & computer vision: YOLOv8, dataset annotation, model training and evaluation
- Object-oriented software development with design patterns
- Tools: Git & GitHub, Docker, Label Studio
- Attention to detail and a logical, structured approach
- Own projects

I learn new technologies quickly and I like taking a task from a vague idea all the way to something that actually runs. My degree project taught me to plan my own work, question my own results and keep going when the first three attempts fail. My years in kitchens, care work and security have taught me to stay calm, take responsibility and deliver even when the pressure is on. I am looking for a role where I can keep growing as a developer and contribute to products that make a real difference.
